Sep 2024

Treasurer

- Manage the financial flow of the event, from budgeting and planning to final reporting.
 - Coordinate with the organizing committee to ensure the appropriate and effective use of funds.
-

PROJECTS

- **Café Website "Ngopi Yuk!" | Front-End Web Development Project**

Developed a modern café website as a Front-End Web Development course project. Designed responsive UI/UX interfaces including Home, About, Menu, and Contact pages using HTML and CSS. Created an attractive and user-friendly digital platform to support café promotion and improve customer engagement.

- **HappyPaws – Pet Care Service Application | Mobile Application Project**

Developed a mobile application for pet grooming and pet boarding services. Contributed to UI/UX design and front-end implementation, including features such as pet categories, promotions, and featured services. Created a responsive and informative interface to improve user experience.

- **Traditional Culinary Website "Rumah Makan Nusantara" | Front-End Web Development Project**

Built a responsive culinary website to provide restaurant information digitally. Designed pages such as Home, Menu, About Us, and Contact using HTML and CSS with a modern interface. Helped improve accessibility of menu information and supported restaurant promotion.

- **Madgros Mart – Web-Based Cashier System | Back-End Web Development Project**

Developed a web-based cashier system to simplify sales transaction management. Implemented features such as product management, member data, transactions, and sales reports using PHP and MySQL. Produced an informative dashboard and real-time sales data to support store operations.

SKILLS

- **Soft Skills (Adaptability):** Able to quickly adapt to new environments, responsibilities, and team dynamics while maintaining accuracy and productivity. Open to learning new systems and technologies to improve work performance.
- **Hard Skills (Basic Web Development):** Capable of developing basic web applications using HTML, CSS, and PHP, with an understanding of fundamental database concepts to support simple web-based systems.
- **Hard Skills (Microsoft Office) :** Proficient in using Microsoft Office applications (Word, Excel, and PowerPoint) to manage documents, organize data, and prepare professional reports and presentations.
- **Hard Skills (Data Administration):** Skilled in data entry, document management, and maintaining organized digital and physical records to support operational efficiency.
